

## SLE TRAINING

### KNOWLEDGE TEAMWORK SKILLS FOR INTERNATIONAL COOPERATION

SLE TRAINING is a training programme for professionals working in international cooperation.

Few fields are as diverse and complex. Working in international cooperation requires dedication, excellent and up-to-date knowledge and the ability to advise and work closely with people and organisations for transformational change.

Our participants come from all around the globe. This unique mix of different backgrounds and professions enables a transdisciplinary exchange of experiences within an intercultural learning environment.

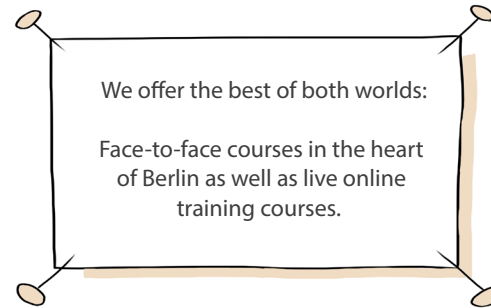

The global goal of our training courses is to enable you to act in a solution-oriented manner despite often uncertain, volatile, unpredictable and complex situations. We therefore offer hands-on methods with real applications and promote experience-based learning.

## TRAINING PHILOSOPHY

“Learning by doing for impact” is a key element of our training philosophy. Applied methods and creating room for collaborative learning, both from and with others, are essential to our face-to-face and online trainings. Training courses focus on participatory problem-solving and seek to incorporate the experience of participants.

The transfer to everyday professional life is facilitated by practice-oriented, interactive formats such as group exercises, case studies, simulations and room for reflection all according to relevance regarding participants’ needs and future applications.

As part of Humboldt University, SLE TRAINING combines first-class scientific standards with experience-driven practical approaches.

We promote the interpersonal dimension of international cooperation: human interaction, team work, exchange of ideas, creation of an inspirational work atmosphere, active listening, mutual learning and collaboration beyond personal, professional and national/ cultural backgrounds.

We are looking forward to meeting you!

Since 2006 we have welcomed more than 1400 participants from 126 different countries.

## TARGET GROUP

Our participants come from all around the globe. They include staff from development agencies, national and international NGOs, public institutions, university students and researchers, as well as professionals from the private sector. A good command of English is a prerequisite.

"The SLE TRAINING course was very interesting for me, not only by its content, but also for the intercultural exchange among people from all over the world."

Book Sambo, Mozambique

Our online trainings are not pre-recorded training videos, webinars for large audiences or self-paced e-learning courses. They are virtual live trainings delivered by our trainers in real-time, focusing on the interaction of a small group of remote participants.

Just like our face-to-face trainings, these live online training courses aim at tailoring the discussions and learning experiences to the training needs of the participants.
