

## DRR STAMMTISCH LUNCHTALK SERIES

### INNOVATIVE (MONITORING) STRATEGIES AND DEVELOPMENTS IN AVALANCHE AND GLACIER RESEARCH FOR DISASTER PREPAREDNESS

**February 25, 2026 - 11.30 am CET**

You are welcome to join a lunch talk hosted by Disaster Competence Network Austria (DCNA) addressing innovative (monitoring) strategies and developments in avalanche and glacier research for disaster preparedness. The webinar is aimed at snow scientists, emergency responders, mountain rescue volunteers, and other experts interested in the topic, and will explore

- how climate-driven changes such as rising temperatures, permafrost thaw, and glacier retreat are reshaping hazard regimes,
- emerging extreme events that exceed historical experience and their implications for risk assessment and disaster management,
- how scientific research, monitoring institutions, and public authorities can cooperate better to translate new insights into timely and effective decisions in a rapidly changing climate.

#### Speakers

**Andrea Fischer, ÖAW**  
(Austrian Academy of Sciences)

**Jan-Thomas Fischer, BFW**  
(Austrian Research Centre for Forests)

#### Register now

The webinar will be hosted on MS Teams.  
Please make sure to register beforehand
